SUBJECT: Dr. Carlton GOODLETT

1. [redacted] has reported that Subject, a Negro physician and editor from San Francisco, attended the meeting of the International Liaison Committee (ILC) of the Stockholm Conference on Vietnam which was held in Stockholm on 17-18 January 1970. On the list of participants Subject was listed as the representative of the Committee for International Peace Action, but in fact he also represented the West Coast organization of the New Mobilization Committee. At the ILC meeting Subject was invited to attend a conference in East Germany on 19-23 January 1970 which was being sponsored by the World Council of Peace, but he refused the invitation.

2. Subject has stated that he is basically sympathetic to the Black Panther Party (BPP), but he believes that the BPP tactics are stupid. He referred specifically to press conferences publicizing forthcoming BPP activity and to David HILLIARD's threats against the life of President Nixon. Subject indicated that he did not oppose violence, but he did oppose announcing it before the fact. He complained that every time the Black Panthers get into trouble, they call on him for assistance. Subject claimed that he had raised more than $250,000 for the BPP, and that he did not intend to raise any more funds for the Party.
